

SPEAKER PROFILE

Ron Rochon, FAIA

PARTNER, THE MILLER HULL PARTNERSHIP

Ron Rochon has established a career-spanning passion for exploring how architecture can affect the significant role buildings play in carbon emissions and carbon management. Since joining Miller Hull in 2000, Ron has developed an appreciation for the elegant integration of high-performance architecture and engineering. He continues to serve as Partner-In-Charge on a broad range of complex projects, like the Bullitt Center, the first Living Building certified office building in the world. Since becoming Managing Partner of Miller Hull, Ron has taken the firm to the next level as a thriving practice, addressing contemporary design challenges by incorporating science and technology.

After 12 years in another industry, Ron earned his Master's in Architecture from the University of Washington, and has since worked to advance impactful design on a broad scale. He shares his industry experience with others by speaking regularly at conferences and participating in panels and numerous industry-related boards and committees.
